

PREPARING FOR YOUR FLEXIBLE SIGMOIDOSCOPY EXAMINATION WITH FLEET READY TO USE ENEMA

A flexible sigmoidoscopy is a routine procedure that allows your doctor to examine your lower bowel for potential problems. It only takes a few minutes, and is important in helping to maintain your good health.

To prepare your bowel for examination, you will need two Fleet Enemas. Use the first enema 2 hours before your exam, and the second enema 1 hour before your exam. Carefully read and follow the usage instructions on the back of this page. For more information, read the carton containing the Fleet Ready to Use Enema.

Fleet Enema is designed to be safe and easy to use, and will thoroughly cleanse your lower bowel. For maximum ease and comfort, it comes ready to use in a disposable squeeze bottle with its unique, pre-lubricated Comfortip nozzle. And Fleet Enema works quickly – normally in about 2 to 5 minutes. Fleet Enemas are Latex Free. Allergic reaction to materials containing Latex is a growing and serious medical problem.
